

CANCER CONSORTIUM GLOBAL COORDINATING CENTERS

FRED HUTCHINSON
UNIVERSITY OF WASHINGTON
CANCER CONSORTIUM

Coordinating Centers serve as the central node of a vast research network, turning research data to research results.

¹Coordinating Centers:

Coordinating Centers manage research around the world. They develop standards and train investigators, ensuring that data collection is consistent throughout a network. The Centers ensure open access to research data and develop robust biostatistical tools for the analysis of complex data sets.

- ACC:** Asia Cohort Consortium
- CITN:** Cancer Immunotherapy Trials Network
- EDRN:** Early Detection Research Network
- GECCO:** Genetics and Epidemiology of Colorectal Cancer Consortium
- GENEVA:** Whole Genome Studies Coordinating Center (UW)
- HVTN:** HIV Vaccine Trials Network
- PROSPR:** Population-based Research Optimizing Screening through Personalized Regimens
- SWOG:** Southwest Oncology Group
- SCHARP:** Statistical Center for HIV/AIDS & Prevention
- TREC:** Transdisciplinary Research on Energetics and Cancer
- WHI:** Women's Health Initiative

²Examples of Studies Supported:

- HIV Vaccine Testing (Europe, South America, Africa, North America)
- WHI: Aging and Health in Women (North America)
- BMI and Mortality in Asian Populations (Asia, India, North America)
- Early Detection of Malignancies due to Asbestos Exposure (Australia)
- Evaluating Risk for Sporadic Colorectal Cancer (ASTERISK) (Europe)
