

Protocol Information

Protocol #: RG

Principal Investigator:

Date Response Submitted to SRC:

OnCore CTMS

The accrual to date in OnCore is correct.

The current study status and status history in OnCore is correct.

Participant statuses and related dates are correct in OnCore.

Expected Accrual Information:

Protocol Target Accrual:

RC Total Accrual Goal:

Expected Accrual Duration: months

Accrual Track

Are you requesting the Alternative Accrual Track?

Yes

N/A

*If the trial is already on the Alternative Accrual Track or does not meet requirements per the [Low Accrual Policy](#), mark N/A.**The Accrual Track can be found in OnCore. See PC Console > Reviews > SRC*

Disease Incidence: / 100,000

Rationale to justify alternative accrual track request, including background on the incidence provided above:

Response to SRC

Reason for low enrollment:

Describe plan for resolving extenuating circumstances and increasing accrual:

Provide scientific rationale for continuing the trial:**For multi-center trials, provide details from across the entire trial to demonstrate continued scientific relevance.****Can scientific objectives still be met if enrollment is delayed or lower than originally planned?****Are you still collecting data from at least one enrolled participant, for at least one primary outcome measure?
If not, provide justification for remaining open to accrual and describe how scientific conclusions can be made if data is no longer collected for the primary outcome(s).****Signature**

	Printed Name	Date

The Scientific Review Committee monitors trial accrual and has the authority to terminate further accrual in trials no longer demonstrating adequate scientific progress per the Low Accrual Policy. Please visit www.CancerConsortium.org for more information.
