

Protocol Information

Protocol #: RG

Principal Investigator:

Date Response Submitted to SRC:

OnCore CTMS

The accrual to date in OnCore is correct.

The current study status and status history in OnCore is correct.

Participant statuses and related dates are correct in OnCore.

Expected Accrual Information:

Ensure responses reflect updated protocol goals and timeline.

Protocol Target Accrual:

RC Total Accrual Goal:

Expected Accrual Duration:

months

Accrual Track

Are you requesting the Alternative Accrual Track?

Yes

N/A

*If already on the Alternative Track or the trial does not meet requirements per the [Low Accrual Policy](#), mark N/A.**The Accrual Track can be found in OnCore. See PC Console > Reviews > SRC*

Disease Incidence: / 100,000

Rationale to justify alternative accrual track request, including background on the incidence provided above:

Competing Trials

Are there currently open trials that compete with this trial under review?

Yes

No

If yes, provide details below.

List the RG# for each competing trial:

How do the trial(s) listed above compete with the trial under review and how are they prioritized?

Response to SRC

Scientific justification to re-open the trial:

Reason for low enrollment:

**Does the trial still have scientific merit? Provide detailed explanation:
For multi-center trials, provide details from across the entire to demonstrate continued relevance.**

Describe plan for resolving extenuating circumstances and increasing accrual, if re-opened:

Can scientific objectives still be met if enrollment is delayed or lower than originally planned?

Signature

	Printed Name	Date

The Scientific Review Committee monitors trial accrual and has the authority to terminate further accrual in trials no longer demonstrating adequate scientific progress per the Low Accrual Policy. Please visit www.CancerConsortium.org for more information.
